

CONTENTS OF VOLUME 7

NUMBER 1

J. ECHANOBE, J.R. GONZÁLEZ DE MENDÍVIL, J.R. GARITAGOITIA. Deformed systems for contextual text recognition . . .	3
K. KAZLAUSKAS. Pipelining of IIR digital filters	15
R. PUPEIKIS. On adaptive threshold intervals for stopping recursive least squares in the space of signals	27
M. de la SEN, J. JUGO. Adaptive robust control for a class of systems with point delays	39
V. SKAKAUSKAS. The evolution of migrating two-sexes populations	83
V. SLIVINSKAS, V. ŠIMONYTĖ. MATLAB-based software for estimation of quasipolynomials in noise	97

NUMBER 2

A. BASALYKAS. The expected probability of misclassification of linear zero empirical error classifier	137
R. ČIEGIS, O. ŠTIKONIENĖ. Analysis of the numerical stochastic approximation methods for nonstationary linear diffusion problem	155
J. MOCKUS, E. SENKIENĖ. Optimization of a “mixture” of pure heuristics and Monte Carlo algorithms	167
M. de la SEN. Non-periodic and adaptive sampling. A tutorial review	175
V. SKAKAUSKAS. The unique solvability of non-migrating limited panmiction population evolution problem	229
D. ZAHARIE. A Markovian study of recurrent neural networks with stochastic dynamics	255
A. ŽILINSKAS. A quadratically converging algorithm of multidimensional scaling	268

NUMBER 3

R. ČIEGIS, R. ŠABLINSKAS, J. ŠIMKEVIČIUS, J. WAŚNIEWSKI. Load balancing problem for parallel computers with distributed memory	281
--	-----

R. ČIEGIS, J. ŠIMKEVIČIUS, J. WAŚNIEWSKI. Running finite-difference schemes for 3D diffusion problems on parallel computers with distributed memory	295
G. DZEMYDA. Computer analysis of the objective function algorithm	311
J.K. HO, E. LOUTE. On the degree of decomposition in linear programming	337
A. LIM. Performance driven placement using tabu search	349
S. PUŠKORIUS, S. MINKEVIČIUS. On estimates of the loss probability for an M/M/n queueing system with channels of different service productivity	361
L. SINTONEN. Stabilizing protocol for a network of processors . .	371
V. ŠTUIKYS. Analysis of well-understood domain for software tools building	389

NUMBER 4

C.F. ALASTRUEY, M. de la SEN. Analytic solution of homogeneous point-delay systems. The first order case	411
J. BULOTAITĖ, G. GRIGAS, A. ŽANDARIS. Teaching of computer programming by electronic mail	419
A. GARLIAUSKAS, M.M. GUPTA. Control distributed parameter systems with orthogonal neural network learning	431
A. LIM, Y.-M. CHEE, W. HSU. Upgrading links for performance .	455
A. LIPEIKA, J. LIPEIKIENĖ. Speaker identification methods based on pseudostationary segments of voiced sounds	469
A.M. MONTVILAS. Processing of sequential information of complicated dynamic system states	485
D. NAVAKAUSKAS. New trends in speech processing with artificial neural networks	495
A.J. POŠKA. Mathematical models of an automatic system for localizing dust explosions	517
V. ŠALTENIS. Analysis of multivariate function structure in classification problems	525
