

CONTENTS OF VOLUME 2

NUMBER 1

J. GRANDELL. Finite time ruin probabilities and martingales . . . . .	3
V. KAMINSKAS, K. ŠIDLAUSKAS, Č. TALLAT-KELPSA. Constrained self-tuning control of stochastic extremal systems . . . . .	33
N. KLIGIENĖ. Likelihood inference about a change point in switching autoregression . . . . .	53
J. LIPEIKIENĖ. Robust estimation of a change point in the properties of autoregressive sequences . . . . .	66
A.-M. MONTVILAS, R. NARKOWICH, E. SHPILEWSKI. Discriminant analysis of random processes . . . . .	77
J. PUNYS. Hierarchical 2D shape representation and compression by rectangles . . . . .	100
L. TELKSNYS. Detection of emergence of slow linear changes in the properties of random processes . . . . .	117

NUMBER 2

R. ČIEGIS. On the difference schemes for problems with non-local boundary conditions . . . . .	151
G. DZEMYDA, V. TIEŠIS. On the use of coordinated calculations in the solution of external problems . . . . .	171
R. GABASOV, P. GAISHUN, F. KIRILLOVA. Optimal estimator for linear systems . . . . .	195
A. GARLIAUSKAS, A. MALICKAS. The neural network environmental model and software . . . . .	221
X. LIU, S. ZHANG. Stackelberg strategies for singular dynamic games . . . . .	233
A. MAKAUSKAS. On a possibility to use gradients in statistical models of global optimization of objective functions . . . . .	248
E. PRANEVITCHUS, R. ČEPONYTĖ. Application of logical programming for the analysis of aggregative specifications . . . . .	255
K. SCHITTKOWSKI. Heuristic reasoning in mathematical programming . . . . .	278

## NUMBER 3

A. ANTAMOSHKIN, E. SEMIONKIN. Optimization of polimodal locally monotone pseudoboolean functions . . . . .	331
A. CHARNES, J. SEMPLE. Practical error bounds for class of quadratic programming problems . . . .	352
R. GABASOV, F. KIRILLOVA, S. PRISCHEPOVA. Optimal identificator of dynamic systems . . . .	367
M. GALANIN. Comparison between solutions of the Maxwell system of equations and its quasi-stationary approximation . . . . .	378
A. GARLIAUSKAS, A. GUTMAN, A. SHIMOLIUNAS. Some logic functions realized on a stationary nonlinear dendrite. 1. Exciting synapses . . . .	403
X. LIU, S. ZHANG. Three-level Stackelberg strategies in linear-quadratic singular systems . . . . .	414
Š. RAUDYS. On the effectiveness of Parzen window classifier . . . . .	434

## NUMBER 4

V. DAGIENĖ, G. GRIGAS. An environment for teaching of algorithms . . . . .	473
V. DUMBRAVA, R. KAŽYS, L. MAŽEIKA, L. SVILAINIS. Digital ultrasonic imaging system: the software concept . . . . .	478
S. JANUŠONIS. Self-formation technology . . . .	497
R. JASINEVIČIUS. The new trend in parallel space-time computer architecture . . . . .	516
K. URBAITIS. Continuation transformation and reduction . . . . .	524
A. ANTAMOŠKIN, Y. KOSHKIN. The cutting off algorithms for pseudoboolean optimization . . . .	539
K. KAZLAUSKAS. A unified view on block and scalar impulse responses . . . . .	552
A. NEMURA, D. PLUKAITĖ. Properties of linear continuous dynamical system transfer function parameters estimates obtained by the method of auxiliary variables . . . . .	564
R. PUPEIKIS. Recursive robust estimation of dynamic systems parameters . . . . .	579
